EDUCATION

B.Tech CSE-AIML

Graduating May 2026

GLA University | Percentage: 65.7%

Relevant coursework: Data structures and algorithms, Object oriented programming, SQL

12th (Intermediate)

2022

Percentage: 82.8%

10th (High School)

2020

Percentage: 82.2%

TECHNICAL SKILLS

Programming Languages: C++, Python

Web Technologies: HTML, CSS, Javascript

Databases: MongoDB, MySQL

Tools: Git, Github, VS code, Postman(API Testing), Google Colab

AIML: Machine Learning, Deep Learning, Reinforcement Learning, OpenAI APIs, Working with Flask, Agentic AI

COURSE

JOVAC: Advanced Data Science

June 2024 – July 2024

- Learned core concepts of Data Science including data preprocessing, EDA, and machine learning
- Gained hands-on experience in data analysis, machine learning, and data visualization
- Worked with Python libraries like NumPy, Pandas, and Matplotlib
- Built basic ML models for prediction and classification tasks

ACADEMIC PROJECTS

Safe and Smooth path driving for mobile robots using hybrid bee colony algorithm

April 2025

Collaborated in a team of three to design model.

- Built a navigation system for mobile robots focusing on safe, collision-free, and smooth path execution
- Applied path planning and optimization techniques for efficient movement
- Integrated obstacle avoidance mechanisms for real-time navigation
- Tools/Technologies: Python / C++, ROS, Simulation tools

Building Stock trading Platform

Jan 2026 – Feb 2026

Led team of three to design and develop a mouse-like device to allow quadriplegic patients to use websites.

- Built and deployed a full-stack stock trading platform.
- user authentication, portfolio management, buy/sell simulation, and interactive dashboards
- Tools/Technologies: React, Node.js, and MongoDB.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional

Aug 2025

- This course includes a basic understanding of Machine Learning and Deep Learning concepts and experience with Python language. A strong understanding of the Large Language Models (LLMs) and are skilled at using OCI Generative AI Service

ANTHROPIC: AI Fluency – Framework and Foundations

March 2026

- Gained foundational knowledge of AI concepts, including machine learning and data-driven systems
- Explored AI frameworks and their practical applications across industries
- Learned principles of responsible AI, ethics, and transparency

ANTHROPIC: Claude 101

April 2026

- Learned fundamentals of Claude AI and prompt engineering
- Explored practical use cases of generative AI tools
