SUMMARY

Backend-focused CS undergraduate with hands-on experience building REST APIs using Node.js, Express.js, MongoDB, and Redis. Worked on projects involving authentication, rate limiting, async processing, session management, and transaction handling while exploring backend development practices through personal projects. Solved 500+ DSA problems across coding platforms and enjoys building practical software systems.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL

Backend: Node.js, Express.js, REST APIs, Middleware Design, API Development

Databases: MongoDB, Redis, MySQL

Auth & Security: JWT, refresh token rotation, bcrypt, session management, rate limiting

Concepts: HTTP/HTTPS, async job queues, input validation, transaction handling

Tools: Git, GitHub, Postman, Render, Vercel

PROJECTS

AuthAPI – Authentication & Session Management

March 2026

Tech: Node.js, Express.js, MongoDB, Redis, BullMQ | **GitHub:** github.com/Ishu6129/AuthAPI

- Built JWT-based authentication with access/refresh token rotation for secure multi-device session management.
- Implemented Redis-backed tiered rate limiting for login, OTP, and API endpoints to protect against abuse.
- Added session tracking using IP and browser information to manage active logins and support logout across devices.
- Used BullMQ for asynchronous OTP and password reset email processing to keep request handling responsive.

LedgerFlow – Financial Transaction API

Feb 2026

Tech: Node.js, Express.js, MongoDB | **GitHub:** github.com/Ishu6129/LedgerFlow

- Built a DEBIT/CREDIT ledger system to maintain transaction records and audit history.
- Implemented transaction handling using MongoDB sessions to ensure consistency across multi-step operations.
- Used UUID-based idempotency keys to reduce duplicate transaction processing during request retries.
- Explored backend patterns around transaction workflows, API reliability, and data consistency.

PROBLEM SOLVING

- Solved 500+ problems on LeetCode, CodeChef, and GeeksforGeeks.
- Comfortable solving problems involving arrays, strings, recursion, trees, and graphs.

EDUCATION

GLA University, Mathura

Expected May 2027

B.Tech in Computer Science (AI & ML) | CGPA: 8.47 / 10

Vidya Devi Jindal School, Mathura

2023

Class XII: 86.6% | Class X: 95.0%

CERTIFICATIONS

- API Development & Automation – Postman Student Expert – 2024
