## Education

### GLA University

Bachelor of Technology in **Computer Science**, Specialization in **AI / ML and IoT** – 7.72

Mathura, U.P., India

Aug. 2023 – May 2027

### St. Mary's Inter College

Intermediate – Class XII<sup>th</sup> – 81%

Etawah, U.P., India

Apr. 2021 – Mar. 2022

### St. Mary's Inter College

High School – Class X<sup>th</sup> – 90.8%

Etawah, U.P., India

Apr. 2019 – Mar. 2020

## Industrial Training

### Data Analyst Training

Jun. 2024 – Jul. 2024

#### SkillCred

Remote

- Performed data cleaning using filtering, sorting, text-to-columns, conditional formatting, and basic data validation.
- Built **Excel** and **Power BI** dashboards for business reporting.
- Worked in a fast-paced, deadline-driven collaborative environment.

## Projects

### [Autonomous Cold – Chain Spoilage Prediction System](#) | *AgenticAI, EdgeAI, GenAI*

Feb. 2026 – Present

- Implemented an **IoT-driven cold-chain monitoring system** to collect temperature, humidity, vibration, door-event, and GPS telemetry, enabling proactive spoilage-risk tracking across simulated logistics workflows.
- Developed **Edge AI time-series prediction pipelines** for spoilage risk and time-to-failure estimation, and integrated model outputs with backend APIs to support real-time risk scoring and autonomous decision workflows.
- Built a full-stack dashboard to visualize shipment health, risk predictions, agent actions, and audit logs, while supporting **GenAI + RAG-based explanations using SOPs**, historical context, and regulatory guidelines.
- Role: **Edge AI/ML Engineer & Full Stack Developer**.

### [Deepfake Detection and Generation System](#) | *XceptionNet, Full-Stack AI*

Aug. 2025 – Dec. 2025

- Built a modular deepfake platform with separate frontend, backend, detection, and generation pipelines to support end-to-end synthetic media creation and forensic analysis workflows.
- Integrated **ROOP**-based deepfake generation and **XceptionNet**-powered detection to enable both media manipulation and authenticity verification within a unified system.
- Developed backend job orchestration for reliable generation requests using non-blocking processing and status-based progress tracking for improved scalability and user experience.
- Role: **AI/ML Engineer & Full Stack Developer**.

## Technical Skills

- **Languages:** Java, Python, SQL (MySQL, Postgres, NoSQL), JavaScript, HTML/CSS
- **Frameworks:** React, Node.js
- **Developer Tools:** Git/GitHub, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse
- **Libraries:** pandas, NumPy, Matplotlib, seaborn, scikit-learn, pytorch, tensorflow and many more

## Achievements

- Achieved 1<sup>st</sup> position in 8-hour ML hackathon held in GLA University
