Education

GLA University

Aug. 2023 – July 2027

Bachelor of Science in Computer Science

Mathura, Uttar Pradesh

Relevant Coursework

- Data Structures And Algorithms
- Computer Networks
- GenAI & LLMs
- Operating Systems
- Web Technology
- Database Technology
- Cloud Computing
- Computer Organisation

Experience

OkDriver Smart Dashcams Pvt. Ltd., Delhi

May 2025 – July 2025

Machine Learning Engineer Intern

Remote, Delhi

- Integrated lightweight CV models using YOLO, Haar Cascades, and landmark detection optimized for edge devices like Raspberry Pi and Android smartphones.
- Annotated real-world driving datasets to train and refine okDriver's core AI engine.
- Contributed to building a bi-lingual talkbot AGI prototype for in-car conversational safety alerts.

SKILLHIGH EDU TECHNOLOGIES LLP

July 2025 – December 2025

AI/ML, Data Analytics, and Data Science Mentor

Remote, Telengana

- Conduct live interactive sessions for the domains of Artificial Intelligence & Machine Learning (AI/ML), Data Analytics, and Data Science as per the schedule provided by the Company.
- Provide guidance and mentorship to students throughout their project work.
- Till now teach 100+ students and take queries and help in building real time projects.

Projects

Deepfake Video Detection System

[Website URL](#) / [GitHub URL](#)

- Developed a real-time deepfake detection system using Vision Transformer (ViT) with temporal and frequency-based video analysis.
- Built a scalable FastAPI backend and a modern Next.js 14 frontend to handle end-to-end video processing and inference.
- Implemented multi-stage pipelines including frame sampling, face detection, temporal consistency checks, and multi-modal prediction fusion.

RetroGhost

[Website URL](#) / [GitHub URL](#)

- Built an interactive CRT-style terminal experience that resurrects legacy systems (MS-DOS, UNIX, BASIC, FORTRAN) with historically accurate personalities and command behavior.
- Developed a React + Vite frontend with authentic scanline effects and a Vercel serverless backend simulating 20+ obsolete commands via a custom persona engine.

- Implemented era-specific conversational AI and command simulation to teach computing history through real-time interaction and side-by-side retro vs modern comparisons.

Raj Shamani - Premium Personal Brand Website

[Website URL](#) / [GitHub URL](#)

- Podcast Section featuring "Figuring Out with Raj Shamani", Impact & Stats with animated counters (14.7M+ subscribers, 1.7B+ views), Media & Recognition featuring Forbes and other achievements.
- Full-Screen Hero Section with cinematic animations, Authority Section showcasing conversations with global icons (Bill Gates, Vijay Mallya, Michael Phelps, Sunita Williams).
- Story & Journey highlighting key milestones, Book Section for "Build, Don't Talk", Collaborations & Speaking opportunities, Social Connect section with all platforms.

Technical Skills

Languages: Python, Java, PHP, HTML/CSS, JavaScript, SQL

Developer Tools: VSCode, Google Cloud Platform, AWS, Azure

Technologies/Frameworks: Linux, Docker, Kubernetes, GitHub/Git

Leadership / Extracurricular

- Winner 5+ hackathons
- Mentor of SSOC and Contributor in HacktoberFest, GSSoC
- AWS Educate Cloud Computing
- Python Development Essentials by Udemy
- Postman API Fundamentals Student Expert
