PROFESSIONAL SUMMARY

B.Tech Computer Science (AI & ML) student with experience in Python, AI systems, robotics, and cloud-based applications. Skilled in building autonomous systems, data-driven applications, and scalable software solutions. Interested in applying software engineering and machine learning to solve real-world problems.

EDUCATION

B.Tech Computer Science (Artificial Intelligence & Machine Learning) GLA University, Mathura , CPI : 9.29	2024 - Present
Intermediate (CBSE) Shriji Baba, Saraswati Vidya Mandir, Mathura , Percentage : 94.8%	2024
High School (CBSE) Shriji Baba, Saraswati Vidya Mandir, Mathura , Percentage : 96%	2022

TECHNICAL SKILLS

Programming Languages : Python, Java, C, SQL, Bash
Artificial Intelligence & Machine Learning : Scikit-learn, TinyML, Edge Impulse, Model Training and Evaluation
Robotics & Embedded Systems : Arduino, Raspberry Pi, NVIDIA Jetson Nano, Ultrasonic Sensors, PID Control
Cloud & Deployment : Microsoft Azure, Render, Vercel, Streamlit, Hugging Face Spaces, REST API Integration
Tools & Platforms : Git, GitHub, Power BI, VSCode, Google Colab, Canva, Kaggle, Linux, Jupyter Notebook
Software Development: Data Structures & Algorithms, Object-Oriented Programming, REST API Development, Code Optimization, Debugging

PROJECTS

Dhruvishya – Autonomous Smart Car

- Built an autonomous robotic vehicle capable of obstacle detection and avoidance using ultrasonic sensors.
- Implemented PID-based control for navigation and stability.
- Integrated TinyML models for adaptive speed control and edge intelligence.

Project Ashwini – IoT Healthcare Monitoring System

- Constructed an IoT-based healthcare monitoring system to track patient vitals in real time.
- Established sensor data pipelines with cloud dashboards for visualization.
- Designed separate interfaces for doctors and patients to monitor health metrics.

Expobot - Project Demonstration Robot

- Developed an AI-powered exhibition guide robot with voice interaction and real-time project explanations.
- Implemented computer vision and voice interaction for person detection and natural human-robot communication.
- Built PID-based autonomous navigation using Jetson Nano and Arduino controllers.

EXTRACURRICULAR

- Certifications**: Microsoft Azure Fundamentals, Microsoft Azure AI Fundamentals, NPTEL Software Engineering.
- Activities**: World Robotics Championship Technoxian 9.0 Participation, Organized Tech based Workshops and Sessions.
- Leaderships**: Leading tech communities in college, mentoring students in AI/ML model development and IoT Robotics projects.
