EDUCATION

GLA University, Mathura, B.Tech - Computer Science (AI & ML)
CGPA: 8.01 / 10

2024 – 2028

Saraswati Vidya Mandir, Etah, Senior Secondary (CBSE)
Percentage: 84.6%

2023

TECHNICAL SKILLS

Programming Languages — C, Python, Java, **Web Development** — HTML, CSS, React, **Frameworks** — Flask, Django, **Data Science Libraries** — Pandas, NumPy, Scikit-learn, TensorFlow/Keras, XGBoost, LightGBM, **Tools & Technologies** — SQL, Docker, Redis, AWS, Streamlit, AZURE, **Machine Learning** — CNN, XGBoost

ACHIEVEMENTS & INTERESTS

Built multiple AI/ML and Full-Stack development projects demonstrating end-to-end engineering skills. | **Active competitive programmer on LeetCode, consistently practicing data structures and algorithms.** | **Interests** — Cricket, Chess

PROJECTS

Multilingual Government Form Translator

- Built an AI system that translates government forms into 50+ languages while preserving layout using OCR and LayoutLMv3.
- Fine-tuned BERT for field classification and T5 for legal text simplification to improve translation accuracy.
- Developed an end-to-end pipeline using FastAPI, Redis, Celery, and Next.js, deployed with Docker on AWS.

AI Earthquake Prediction

- Developed a predictive model to forecast seismic activity (magnitude and depth) using historical USGS geophysical data.
- Trained and evaluated **8 Machine Learning models**—including Random Forest, XGBoost, SVM, and Neural Networks—to identify the most accurate architecture.
- Performed extensive **Feature Engineering** on spatial and temporal data, achieving a [Insert Your Accuracy, e.g., 88%] accuracy rate with the champion model (XGBoost).
- Utilized Python (Scikit-Learn, Pandas) to visualize seismic clusters and validate results using RMSE and R-squared metrics.

Fruit Quality Classification

- Built a CNN-based deep learning model to classify fruit images as fresh or rotten with high accuracy.
- Applied image preprocessing and data augmentation techniques to improve model generalization and robustness.
- Implemented using Python and TensorFlow/Keras for automated fruit quality detection in production pipelines.

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900)

— Microsoft | Jan 2025

Microsoft Certified: Azure AI Fundamentals (AI-900)

— Microsoft | Dec 2025

Problem Solving (Intermediate)

— HackerRank | Nov 2024
