OBJECTIVE

Aspiring AI/ML Engineer with strong programming skills in Python, Java, and C, and a solid foundation in Machine Learning, Data Structures, and SQL. Microsoft Azure-certified in Cloud and AI Fundamentals, seeking opportunities to contribute to innovative AI solutions within a growth-oriented organization.

EDUCATION

GLA University, Mathura
Bachelor of Technology in Computer Science (Specialisation in AI/ML)
CPI: 6.2/10 | Expected: 2026

SKILLS

Languages:	Java, Python, C, JavaScript (ES6+), SQL
Web Development:	React.js, Node.js, Flask, FastAPI, HTML5, CSS3
Databases:	MySQL, MongoDB
Frameworks & Tools:	Git, GitHub, Postman, VSCode, Jupyter Notebook
Libraries:	NumPy, Pandas, scikit-learn, TensorFlow, Hugging Face Transformers

PROJECTS

Retrieval-Augmented Generation (RAG) System

(React, Node.js, Express, Python, ML, MongoDB)

Feb 2026 – March 2025 | Team Project

- Built an end-to-end Retrieval-Augmented Generation (RAG) pipeline to generate factually accurate and source-grounded answers.
- Interested LLM (**Google Gen. AI / GPT**) with a **document retrieval system** to reduce hallucinations.
- Designed a **semantic search layer** using embeddings to fetch relevant documents from a knowledge base.
- Implemented **evidence-based response generation**, returning answers along with supporting documents.
- Developed a **faithfulness scoring mechanism** to evaluate answer correctness against retrieved context.
- Built REST APIs using **Flask / FastAPI** for query handling and response generation.
- Performed **prompt engineering** to improve answer relevance, coherence, and factual accuracy.
- Debugged and optimized issues like API failures, latency, and retrieval accuracy.
- Enabled **real-time query processing** with scalable backend architecture.

AI Travel Planner

(HTML, CSS, JavaScript, REST API)

Jul 2025 | Personal Project

- Build an AI-based application to generate **personalized travel itineraries**
- Optimised recommendations based on **user preferences and constraints**
- Enhanced user experience with intelligent suggestions
- Technologies: (Gen AI, AI/ML, Web, HTML, CSS, JavaScript, REST API)

ACHIEVEMENTS & CERTIFICATIONS

Certifications

- Microsoft Azure AZ-900 (Azure Fundamentals)**- Demonstrated foundational knowledge of cloud computing concepts, Azure services, pricing models, and security/compliance principles.
- Microsoft Azure AI-900 (Azure AI Fundamentals)**- Gained understanding of AI/ML concepts and Azure AI services including computer vision, NLP, and responsible AI practices.

Milestones

- Solved **100+ algorithmic problems**, strengthening Data Structure and Algorithm and real-world problem-solving abilities.
- Familiar with design patterns and scalable architecture practices.
- Passionate about building production-grade systems, learning new technologies.
