

SHRIKANT SHARMA

Mathura, India | +91 6395977856 | shrikant.sharma_cs.aiml24@gla.ac.in | [GitHub](#) | [LinkedIn](#)

EDUCATION

GLA University, Mathura

Expected June 2028

B.Tech in Computer Science (AI & ML) | GPA: 8.14 / 10.0

Coursework: Data Structures & Algorithms | OOP | DBMS | Operating Systems | Computer Networks | Machine Learning

TECHNICAL SKILLS

Languages: Python, Java, SQL, C, JavaScript, HTML, CSS

Frameworks: FastAPI, Flask, React, Node.js, Flutter

AI / ML: Scikit-learn, Sentence Transformers, FAISS, XGBoost, Random Forest, TF-IDF, NLP

Databases: PostgreSQL, SQLite, Firebase

Developer Tools: Git, GitHub, Docker, Linux, REST APIs, JWT Authentication, CI/CD

Cloud: Microsoft Azure (AZ-900, AI-900 Certified), Vercel, Render

EXPERIENCE

Software Engineering Intern

June 2025 – July 2025

IIT Ropar — Vicharanashala FAQ Crowdsourcing Platform

- Engineered semantic search and AI chatbot features for Vicharanashala, an open-source FAQ platform developed at IIT Ropar, improving query resolution accuracy using NLP embeddings.
- Implemented a micro-step FAQ decomposer and contributor badge system with PostgreSQL persistence, increasing structured knowledge contribution quality.
- Collaborated via Git branching workflows and participated in code reviews, submitting production-ready PRs integrated into the live platform codebase.

PROJECTS

AI Hiring Intelligence System

FastAPI · React · PostgreSQL · Sentence Transformers · FAISS · Docker · JWT

- Architected a semantic resume-matching engine using Sentence Transformers and FAISS vector search, ranking candidates across 10,000+ resume embeddings with sub-second query latency.
- Engineered scalable REST APIs with FastAPI and JWT Authentication, containerized via Docker with role-based access control and modular microservices architecture.
- Implemented an NLP-based resume parsing and AI ranking pipeline backed by PostgreSQL, automating candidate shortlisting and reducing manual screening effort.
- Built a React recruiter dashboard with real-time filtering, ranked shortlists, and explainable AI match panels for transparent hiring decisions.

Network Bouncer — Intrusion Detection System *Python · FastAPI · XGBoost · Random Forest · Scikit-learn · UNSW-NB15*

- Trained an ensemble ML pipeline (XGBoost + Random Forest) on the UNSW-NB15 dataset to classify network intrusions across 9 attack categories with high-precision threat detection.
- Engineered a feature engineering module processing raw network traffic CSVs — resolving column-mapping bugs and aligning 49 features across rule-based and ML detection modes.
- Exposed real-time threat classification via a FastAPI JSON API, enabling IP-level risk scoring and integrating with a React dashboard visualizing live traffic and model confidence.

LifeOS AI — Personal Productivity App

Flutter · Firebase · Gemini API · Calendar Integration

- Built a cross-platform AI productivity app using Flutter and Firebase with Gemini API integration, delivering habit tracking, expense monitoring, and AI-generated daily planning.
- Implemented Firebase real-time sync ensuring consistent offline-first state across Android and iOS; integrated Gemini API to synthesize habits and calendar data into personalized plans.

OPEN SOURCE CONTRIBUTIONS

- Contributed to Vicharanashala (IIT Ropar) — submitted PRs for semantic search and contributor badge logic using Git feature branching; changes merged into the production codebase.

- Participated in structured code reviews on NLP pipeline modules and React component architecture, improving overall maintainability and consistency of the open-source codebase.

ACHIEVEMENTS

- LeetCode: 200+ problems solved (Easy / Medium / Hard) — strong focus on Arrays, Trees, Graphs, and Dynamic Programming.
- Codeforces Rating: 593 — active participant in Div. 3 and Div. 4 contests, strengthening algorithmic problem-solving under time constraints.
- ML Manthan Runner-up — GLA University ML competition; designed and presented a production-grade ML solution competing against 30+ teams.
- SIH 2025 Participant — selected for Smart India Hackathon 2025, India's largest national-level software hackathon, representing GLA University.

CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals (AI-900)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- HackerRank Problem Solving (Intermediate) Certificate
