PROFESSIONAL SUMMARY

Software Engineering undergraduate (Expected 2028) and Microsoft Learn Student Ambassador with extensive programming experience in Object-Oriented languages (Java, C++, Python). Adept at applying core engineering principles, Data Structures, and Algorithms to build scalable, high-performance software solutions. Proven track record of collaborating with stakeholders, adapting to new engineering methods, and driving product availability, reliability, and observability at scale. Seeking to leverage cloud computing and OOP expertise in Companies.

TECHNICAL SKILLS

Core Development: Python (Expert), Java, C++, Go, Rust, SQL, Advanced Data Structures & Algorithms.

AI/Machine Learning: PyTorch, TensorFlow, LLMs (GPT-4, Llama 3), LangChain, RAG Architecture, Computer Vision.

Cloud & DevOps: Microsoft Azure (Certified), AWS, Docker, Kubernetes (K8s), Terraform, CI/CD Pipelines, ML Ops.

Data Engineering: Apache Spark, Kafka, ETL Pipeline Design, Vector Databases (Pinecone, Milvus), PostgreSQL.

EXPERIENCE

Rentits | *Lead Software Engineer* Nov 2025 – Present

- Architected a high-concurrency sharing-economy platform, directly collaborating with stakeholders to translate complex requirements into scalable product features.
- Optimized backend architecture for massive scale, reducing data retrieval latency by 40% through rigorous algorithmic refinement and database tuning.
- Integrated real-time telemetry and error monitoring systems, increasing observability and slashing bug-resolution time by 35% during peak traffic.
- Led an agile development team to scale the platform from MVP to a base of 500+ active users with 99.9% availability.

PW (PhysicsWallah) | *AI Research & Development Intern* July 2025 – Dec 2025

- Engineered a proprietary RAG framework for automated student support, reducing human intervention by 65% for 1M+ users.
- Optimized LLM inference latency by 40% using quantization techniques and NVIDIA Triton Inference Server.
- Architected a real-time data ingestion pipeline that processed 50TB+ of educational content to fine-tune BERT models.

Microsoft | *Microsoft Learn Student Ambassador (MLSA)* Apr 2025 – Nov 2025

- Facilitated 5+ high-impact technical training sessions on Microsoft Azure and cloud architecture for 100+ students.
- Mentored peers on industry-standard engineering practices, including Object-Oriented Design and scalable system design.

Independent Client Projects | *Software Engineer Consultant* Jun 2020 – Nov 2025

- Delivered 10+ bespoke software solutions utilizing Java and C++ to solve mission-critical challenges for enterprise clients.
- Engineered offline-first architectures that improved application efficiency by 30% in network-constrained environments.

ADVANCED TECHNICAL PROJECTS

Nexus-AI: Distributed Multi-Agent Autonomous Swarm

- Developed an autonomous swarm of AI agents using CrewAI and LangGraph for zero-human software engineering sprints.
- Implemented a decentralized consensus mechanism for code peer-review, reducing logic errors by 30%.

Algorithmic Financial Testing Platform

- Built a computational tool utilizing OOP principles to backtest complex financial strategies on historical data.
- Optimized runtime efficiency and processing speed by 25% by implementing custom sorting algorithms and optimizing memory allocation on large datasets.

EDUCATION

GLA University

Bachelor of Technology - B.Tech, Computer Science (AI & ML)

Mathura, India

Aug 2024 – May 2028

- **Status:** Currently pursuing degree;
- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Software Engineering Principles, Operating Systems, Database Management Systems.

CERTIFICATIONS & AWARDS

- **Microsoft Azure AI Fundamentals (AI-900)** | Microsoft
- **Microsoft Azure Fundamentals (AZ-900)** | Microsoft
- **Technology Job Simulation** | Deloitte Australia
