## PERSONAL DETAILS

|               |                                           |
|---------------|-------------------------------------------|
| Date of Birth | 20 February 2006                          |
| Gender        | Male                                      |
| Father's Name | Mr. Manish Pathak                         |
| Address       | A-96 Sangwan City, Aligarh, Uttar Pradesh |

## EDUCATION

|                                                                                                                                                                                            |             |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>B.Tech in Computer Science &amp; Engineering (AI &amp; ML)</b>   GLA University, Mathura                                                                                                | 2024 – 2028 |
| <ul style="list-style-type: none"><li>Relevant Coursework: Python Programming, Java (OOP), Database Management (MySQL), Web Development (HTML), Introduction to Machine Learning</li></ul> |             |
| <b>Class XII (CBSE)</b>   Wisdom Public School, Aligarh                                                                                                                                    | 2024        |
| <b>Class X (CBSE)</b>   Wisdom Public School, Aligarh                                                                                                                                      | 2022        |

## TECHNICAL SKILLS

|              |                                                           |
|--------------|-----------------------------------------------------------|
| Languages    | Python, Java, HTML                                        |
| ML / AI      | scikit-learn, basic ML concepts, Azure Cognitive Services |
| Cloud        | Microsoft Azure (AZ-900 & AI-900 certified)               |
| Databases    | MySQL, Supabase (PostgreSQL), SQL                         |
| Tools / IDEs | PyCharm, IntelliJ IDEA, Git, GitHub, VS Code              |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |      |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Quality Inspection Robot</b>   Team Project   Python   Client-Server   AI/ML                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 2026 |
| <ul style="list-style-type: none"><li>Developed a fully articulated 4-DOF robot arm for automated defect detection on manufactured components.</li><li>Solely responsible for the robot arm control logic — programmed joint movements and positioning sequences.</li><li>Built the client-server communication layer so the AI defect-detection model runs remotely on a laptop and sends real-time commands to the robot, eliminating the need for on-board compute.</li><li>Integrated AI model output with the robot's physical response to flag and isolate defective parts autonomously.</li><li>Demo video (includes live control footage): <a href="#">View on LinkedIn</a></li></ul> |      |
| <b>Fleet Management Dashboard</b>   Python   HTML   Supabase (PostgreSQL)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 2026 |
| <ul style="list-style-type: none"><li>Built a full-stack fleet management web application with a real-time dashboard for vehicle tracking and status monitoring.</li><li>Used Supabase as the backend (PostgreSQL database + authentication) — no server setup required, handled via REST API.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                      |      |

- Implemented CRUD operations for vehicle records, assignment management, and maintenance scheduling.
- Designed an interactive dashboard UI in HTML to display fleet utilisation and vehicle status at a glance.

## CERTIFICATIONS

---

### Microsoft Certified: Azure AI Fundamentals (AI-900) | Microsoft

*December 2025*

- Covers AI/ML concepts, Azure Cognitive Services, Computer Vision, Natural Language Processing, and responsible AI.
- Verify: [verify.certipoint.com](https://verify.certipoint.com) — Code: cSLp-uScT

### Microsoft Certified: Azure Fundamentals (AZ-900) | Microsoft

*January 2025*

- Covers core cloud computing concepts, Azure services, pricing models, SLAs, and cloud governance.
- Verify: [verify.certipoint.com](https://verify.certipoint.com) — Code: wCrX9-48EN

## EXTRA-CURRICULAR & ACTIVITIES

---

- Exploring machine learning concepts through self-study and online resources alongside coursework.
- Collaborative team player — demonstrated in the multi-disciplinary robot project involving mechanical and software integration across a team.
- Actively building personal projects to strengthen full-stack and AI/ML skills.
