

# ANANYA SHUKLA

.NET Full Stack Engineer · AI/ML Developer · Data Analyst | <https://ananya-shukla-portfolio.vercel.app/>  
📍 Agra, India | +91 9719074665 | [ananyashukla0307@gmail.com](mailto:ananyashukla0307@gmail.com) | [linkedin.com/in/ananya-shukla26](https://www.linkedin.com/in/ananya-shukla26) | [github.com/AnanyaShukla0007](https://github.com/AnanyaShukla0007)

## PROFESSIONAL SUMMARY

B.Tech graduate in Computer Science (AI/ML) with production-level experience in .NET Full Stack engineering (ASP.NET Core, Angular, Docker, AWS, CI/CD) and Artificial Intelligence (LLMs, RAG pipelines, CNNs, LangChain). Delivered two deployed applications, three AI/ML projects, and contributed to enterprise systems at Capgemini. Brings precision engineering habits — SOLID design, unit testing, API documentation — alongside the ability to move fast on ambiguous problems. Led GLA University's largest student club while shipping code.

## TECHNICAL SKILLS

**Languages & Frameworks:** C# · Python · Java · SQL · ASP.NET Core · Web API · Angular · HTML · CSS · JavaScript  
**AI / ML & NLP:** Machine Learning · CNNs · NLP · RAG Pipelines · LangChain · Hugging Face · Prompt Engineering · Scikit-learn · NumPy · Pandas  
**Databases & Cloud:** SQL Server · MySQL · Entity Framework Core · Docker · AWS (EC2/S3) · CI/CD (Jenkins)  
**Testing & DevOps:** MSTest · NUnit · Swagger · Postman · Git · GitHub · NLog · Power BI · Tableau · FastAPI

## PROFESSIONAL SKILLS

|                                         |                                      |
|-----------------------------------------|--------------------------------------|
| ◆ Technical Leadership & Mentoring      | ◆ Fast Research & Self-Learning      |
| ◆ Analytical Thinking & Problem Solving | ◆ Code Quality & Attention to Detail |
| ◆ Clear Written & Verbal Communication  | ◆ Deadline & Priority Management     |
| ◆ Agile / Scrum Execution               | ◆ Cross-Functional Collaboration     |
| ◆ End-to-End Ownership & Delivery       | ◆ Adaptability Under Ambiguity       |

## PROFESSIONAL EXPERIENCE

- .NET Full Stack Developer Intern** › Capgemini

Dec 2025 – May 2026

  - Engineered 5+ ASP.NET Core Web API microservices following SOLID principles, reducing inter-service coupling and improving maintainability across the codebase.
  - Built Angular frontend modules consuming RESTful APIs, cutting average page-load friction and improving end-user task completion flow.
  - Secured application endpoints using JWT-based authentication and Entity Framework Core ORM with SQL Server, covering role-based data access across user tiers.
  - Containerized services with Docker and configured Jenkins CI/CD pipelines on AWS, reducing manual deployment steps and enabling consistent delivery cycles.
  - Participated in Agile sprints — authored technical documentation, conducted peer code reviews, and coordinated with QA and design teams for sprint sign-off.
- Generative AI Intern** › Angaar Batch

Jul – Sep 2025

  - Fine-tuned open-source LLMs and built RAG pipelines using LangChain and Hugging Face, improving contextual accuracy of AI responses for domain-specific queries.
  - Engineered structured prompts and evaluated output quality across 3+ model configurations to identify the highest-accuracy deployment setting.
- Data Analytics Intern** › Google (Coursera)

Jun – Aug 2024

  - Executed end-to-end analytics workflows — data extraction via SQL, transformation using R, and visualization in Tableau — producing dashboards used for business reporting.
  - Cleaned and restructured datasets with 10,000+ records, applying statistical validation techniques to ensure reporting accuracy.

## KEY PROJECTS

### ► ParkEase – Online Parking Lot System *[ASP.NET Core · Angular · SQL Server · EF Core]*

- Architected and deployed a full-stack parking management platform supporting real-time slot booking, live availability tracking, and integrated payment flow.
- Designed RESTful API layer with RBAC (role-based access control), separating admin, operator, and user access tiers for secure multi-role operations.
- Modelled a fully normalised SQL Server schema using Entity Framework Core migrations, ensuring data integrity across concurrent booking transactions.
- Documented all endpoints with Swagger and validated with Postman; containerised with Docker for consistent cross-environment deployment.

### ► QuantaMeasure – Quantity Measurement Application *[ASP.NET Core · Angular · Docker · AWS · Jenkins]*

- Designed a type-safe, immutable unit conversion engine supporting 20+ categories with zero-loss precision — deployed and live on AWS.
- Implemented JWT authentication, NLog structured logging, and full Swagger API documentation across the ASP.NET Core backend.
- Achieved automated deployment through Jenkins CI/CD pipeline with Docker containerisation, enabling repeatable zero-downtime releases on AWS.
- Wrote MSTest unit test suite covering core conversion logic, achieving high confidence in correctness across edge-case inputs.

### ► RAG-Scraper-AI-GUI *[LangChain · Hugging Face · FastAPI · Python]*

- Built an end-to-end RAG application combining targeted web scraping, semantic chunking, and vector-store retrieval to significantly reduce LLM hallucinations on domain queries.
- Integrated LangChain orchestration with Hugging Face embeddings and a FastAPI backend to deliver sub-second, context-grounded responses through a GUI interface.

### ► Satellite Image Analysis for Environmental Monitoring *[Python · CNN · Scikit-learn]*

- Trained and optimised a CNN model on 5,000+ satellite images, achieving 87% classification accuracy across land use, deforestation, and water pollution categories.
- Automated the preprocessing pipeline (normalisation, augmentation, batching), cutting manual data preparation time and improving model generalisation.

### ► E-Commerce Sales Dashboard *[Power BI · DAX]*

- Developed 5+ Power BI dashboards using DAX measures, drill-through filters, and dynamic slicers — covering state-wise profit, payment modes, and sub-category KPIs.
- Transformed raw transactional data into a star-schema model, enabling faster query performance and cleaner report logic.

## EDUCATION

**B.Tech, CSE – Artificial Intelligence & Machine Learning** — GLA University, Mathura

(Jun 2026)

**Intermediate (PCM)** — Delhi Public School, Agra

(May 2022)

**High School** — St. Francis Convent School, Agra

(May 2020)

## CERTIFICATIONS & LEADERSHIP

- President, Club Literario — Directed programming, events, and membership for GLA University's largest student society (100+ members, 2025–2026)
- Data Science Workshop Participant — Argmax Business by GLA, applied ML techniques on real datasets (Sep 2025)
- Google Data Analytics Professional Certificate — Coursera (2024)
- Coordinated IBM Ice Day Technical Fest — managed 3-day event logistics and speaker coordination, GLA University (March 2024)
