SKILLS

Languages & Technologies : JavaScript (ES6+), TypeScript, Python, React.js, HTML5, CSS3

Libraries & Frameworks : Redux Toolkit, React Query, React Hook Form, Next.js, TailwindCSS

EDUCATION

GLA University

Aug. 2022 – Jun. 2026

Bachelor of Technology in Computer Science (AI & ML Specialization)

8.67 CGPA

EXPERIENCE

Frontend Developer Intern, *Omniful.ai*

Jul. 2025 – Present

- Owned frontend development for 12+ features across OMS, WMS, and TMS platforms at Omniful.ai.
- Developed features for the Omniful Web App and Omniful Website using React, Redux Toolkit, React Query, React Table, and React Hook Form.
- Built a backend-driven dynamic form renderer supporting schema-based rendering, validation, API-driven props, type safety, and centralized form state management.
- Completed frontend training and became ready to contribute to production-grade applications within 15 days, learning scalable architecture, reusable components, accessibility, and performance optimization.

Machine Learning Intern, *Meridian Solutions* - [link](#)

Feb. 2025 – Jun. 2025

- Managed end-to-end development of an AI-based liveness detection platform including design, frontend, backend integration, and facial verification workflows, improving user authentication security.
- Integrated a real-time dashboard for administrators, providing live insights and analysis of facial verification data.

Design Intern, *SayRnew*

June 2023 – Aug. 2023

- Developed 3+ complete wireframes by understanding client requirements and translating them into user-focused UI/UX designs.
- Completed design training and became ready to contribute within 10 days, gaining experience in web-friendly design, marketing creatives, color systems, visual balance, branding, and design consistency.

PROJECTS

CodeChef Monitor

- Developed a web application with an interactive dashboard to visualize CodeChef contest participation, submissions, and performance heatmaps.
- Engineered the frontend using Charts.js and other libraries to deliver an intuitive UI/UX for competitive programming insights

Papershell: A Research Blogging Platform

- Handled the design, frontend, and backend development of a research blogging platform using Next.js, React, and MongoDB.
- Implemented JWT-based authentication and integrated a WYSIWYG editor with support for rich-text content, tags, categories, and metadata.

Maarg - One Tap Mobility Solution

- Developed a responsive React.js frontend for a one-tap mobility platform integrating bookings, route tracking, and map-based services into a centralized dashboard.
- Integrated real-time location tracking, route visualization, and Mapbox-based navigation features to improve user accessibility and travel management.
