https://github.com/kacks77 India | Open to Relocation | Remote Preferred

SUMMARY

AI Engineer with expertise in Machine Learning and Generative AI, with hands-on experience developing real time content understanding solutions and intelligent agents using LangChain, and State-of-the-art Large Language Models(LLM's) - Gemini, openAI, Mistral, LLAMA 3. Passionate about optimizing deep learning models like Vision Transformers, Variational Autoencoders(VAEs), Generative Adversarial Networks(GANs).

EXPERIENCE

Data Science Intern

NULLCLASS Pvt. Lmt

05/2025 - 07/2025 Remote

Individually contributing to developing a Customer GenAI Chatbot

- Developed a **Generative AI user chatbot** leveraging **Gemini-2.0-Flash**, **LangChain**, **Google GenAI** to generate relatable images and provide intelligent suggestions, seamlessly integrating text-to-image and image-to-text capabilities with robust text conversion features.
- Integrated the model interface with **Streamlit** for real-time user interaction, achieving **70% efficiency**. Utilized **LangChain** to manage automated prompt generation and **increases optimization by 75%** for better multi-step model workflow.
- Experience with Large Language Models(LLMs)**: Integrated Google **PaLM 2**, **Ollama**, **Mistral**, and **Gemini 2.5 Flash** using LangChain for user behaviour analysis, enabling intelligent query processing and insight generation in AI-driven applications.

SDE Intern

Bluestock Fintech

03/2025 - 04/2025 Remote

Group Project - IPO Web Application | Role: Frontend Design

- Developed the login/signup interface and implemented user authentication using React.js as part of the frontend team.
- Technologies used**: React js, MongoDB(data handling), Tailwind CSS.

Mini Project

03/2025 - 04/2025

Project title: Gamifying learning experience through Reinforcement Learning

- Developed a **Reinforcement learning**-based large scale system design of **Advanced AI Game** aiding navigation tasks.
- Integrated **Python-based question answering** of varying difficulty with a gaming environment achieving **90% alignment** with level progression logic, enemy interactions, and goal state triggers.
- Enhanced conversion rate optimization through **deep learning model-Deep Q Networks(Python & Flask implementation)**.

Data Analyst Intern

SkillCred

09/2024 - 12/2024 Remote

Project: **Legal AI Assistant** for interacting with Legal Cases

- Processed over **20+ legal documents** with **75% accuracy**, improving **client efficiency by 60%**. Enabled document uploads with downloadable chat history(LLM- **Gemini-1.5-flash**).
- Developed using **Streamlit**, **Langchain**, and **Google-Generative-AI**. Python libraries(**deep translator**) for **multilingual support**.

SKILLS

Python

ML/AI

LLMs

Object Oriented Programming(OOP)

LangChain

Deep Learning

Vision Transformers

HuggingFace

NLP

PostgreSQL

GCP

Streamlit

INTERESTS

Extracurricular Activities

→ Participated in **ENTREVISTA 2.0** held by **GeeksForGeeks(GFG)**. Have cleared 2 of 3 rounds. Enhancing technical skills and problem-solving abilities.
→ Participated in **Solvathon**, **Team name(Code Geass)**: Design and implemented a chatbot using **Word2Vec**, **Term Frequency-Inverse Document Frequency(NLP Techniques)**.

EDUCATION

Bachelor of Technology in Computer Science(AIML)

GLA UNIVERSITY, CGPA: 7.56

06/2022 - 06/2026 Mathura

Intermediate

Army Public School, PCM(91%), Agg.(89.4%)

06/2018 - 05/2020 Agra, Shivaji Road

High School

Army Public School, Agg.(85.6%)

06/2016 - 05/2018 Agra, Shivaji Road

KEY ACHIEVEMENTS

Certifications:

→ Earned 12 Google Cloud Badges in GEN AI, Gemini and a Completion Certificate in Cyber Security - Google Cloud.

→ Experience Certificate in Remote Sensing and Geographic Information System(GIS) for satellite Imagery.

→ Certificates of HackerRank and Gold Badge in SQL Analytics(Basic, Interm.).
