Objective

Dedicated **B.Tech student in Computer Science (AI & ML)** with a strong foundation in **Artificial Intelligence (AI), Machine Learning (ML), Deep Learning, Natural Language Processing (NLP), Computer Vision, and Data Science**. Experienced in developing Generative AI solutions, AI-driven applications, predictive models, deep neural networks, and transformer-based architectures using **Python, TensorFlow, PyTorch, OpenCV, scikit-learn, and Hugging Face frameworks**. Skilled in feature engineering, model evaluation, hyperparameter tuning, data preprocessing, and AI model deployment. Demonstrated innovation through projects such as **Generative AI Legal Assistant, Virtual Mouse (MediaPipe), and Object Distance Measurement System**. Active in hackathons, coding competitions, and research initiatives, showcasing problem-solving, critical thinking, creativity, and continuous learning in cutting-edge AI/ML and NLP technologies.

B.Tech in Computer Science - AI & ML, GLA University Mathura

Expected Graduation: 2026

CPI: 7.22

Maharshi Patanjali Vidya Mandir, CBSE Board, Class XII

Completed: 2021

Percentage: 87.6%

Relevant Coursework: Complete Data Science, Machine Learning, Deep Learning, NLP Bootcamp (Udemy), The Complete Full-Stack Web Development Bootcamp (Udemy), 100 Days of Code: The Complete Python Pro Bootcamp, Generative AI with LangChain & Hugging Face (Udemy)

Experience

Frontend Developer Intern Codesoft Pvt. Ltd(06/2024-07/2024)

Developed and maintained web applications, including a **portfolio website, landing page, and calculator**, utilizing **HTML, CSS, and JavaScript**. Implemented **interactive features** to enhance user experience and engagement, ensuring applications were **responsive, performance-optimized, and scalable** across devices. Collaborated on **UI/UX improvements**, maintained clean, modular code, and adhered to **best practices** in frontend development.

Projects

Legal Document Draft Generator

[Link](#)

Developed a **Legal Document Draft Generator** using **Streamlit**, integrated with **Google Vertex AI, PaLM API, and Gemini models** to generate **professional legal drafts** leveraging **Generative AI and NLP**. Built with **Python** on **Google Cloud AI Platform**, incorporating **safety filters** to ensure reliability. Demonstrated expertise in **AI model integration, cloud deployment, prompt engineering, and lawtech applications**.

Depth-Estimation-in-Single-Image

[GitHub](#)

Estimated **depth** from a single **2D image** using the **MiDaS model** from **Intel-ISL**, integrated with **Hugging Face** and **PyTorch**. The project captures images from a **webcam** in **Google Colab**, processes them through **MiDaS**, and outputs a **depth map** along with the **estimated distance** at any **pixel coordinate**.

Virtual-Mouse-Using-Mediapipe

[Link](#)

Developed a **Virtual Mouse** using **Python, OpenCV, and MediaPipe** for hand gesture-based control. Integrated **PyAutoGUI** and **pynput** for precise mouse actions. Implemented gesture recognition for clicks and screenshot capture using hand landmarks and finger angles, leveraging real-time webcam input for smooth interactive control.

Skills

Programming Languages: Python, Java

Machine Learning: Logistic Regression, Linear Regression, Natural Language Processing (NLP), K-Nearest Neighbors (KNN), Large Language Models (LLMs), CNN, Decision Trees, Federated Learning

Tools & Technologies: MongoDB, LangChain, Hugging Face, Flask, Streamlit

Soft Skills: Leadership (managed large-scale events), teamwork (collaborated on diverse projects), problem-solving (optimized workflows), communication (technical presentations), adaptability.

Achievements

[All Certificates](#)

- 📄 Secured **third place** in **IBM Solvothon**.
- 📄 Participated in **Codement NCER Pune**, finishing in the **Top 20**.
- 📄 Participated in **MUJ Hack 2.0, Manipal University Jaipur**, successfully **clearing the first round**.
- 📄 Competed in **AlgoUtsav NIT Rourkela** as part of team **CODER X CODER**.
