OBJECTIVE

Driven Software Developer skilled in **Java, Python**, and **JavaScript**, with hands-on experience **building scalable full-stack applications, backend APIs, and AI/ML systems**. Strong problem-solving mindset, clean coding habits, and a passion for cloud, DevOps, and delivering production-ready solutions.

EDUCATION

GLA University, Mathura
Bachelor of Technology in Computer Science (AI/ML Specialization)
CPI: 8.15/10 | Expected: 2026

SKILLS

Languages:	Java, Python, C, JavaScript (ES6+), SQL, Linux
Web Development:	React.js, Node.js, Express.js, Flask, FastAPI, HTML5, CSS3, Tailwind CSS
Databases:	MySQL, MongoDB, H2 (for Spring Boot apps)
Frameworks & Tools:	Git, GitHub, Docker, Spring Boot, Postman, VSCode, Jupyter Notebook
Libraries:	NumPy, Pandas, scikit-learn, TensorFlow, spaCy, Hugging Face Transformers
Concepts:	OOP, CI/CD basics, RESTful API design, Software Development Lifecycle (SDLC), Debugging

EXPERIENCE & TRAINING

Intel Unnati Industrial Training Program

AI/ML Trainee

May 2024 – Jul 2024 | GLA University, Mathura

- Engineered an AI-powered image restoration system using **MobileNetV2** and **deep convolutional neural networks**.
- Evaluated model efficiency using **PSNR** and **SSIM** metrics; proposed practical use cases in forensic imaging and surveillance.
- Developed and deployed a production-ready full-stack web application with Flask backend and Vercel hosting.

PROJECTS

PulseTalk – Real-Time Chat Application

(React, Node.js, Socket.IO, MongoDB)

Jun 2025 – Jun 2025 | Personal Project

- Built a **real-time chat platform** using **Socket.IO**, enabling instant, bidirectional communication between users.
- Developed an **interactive React frontend** with a modern, responsive design for smooth user experience across devices.
- Engineered **Node.js + Express backend** to manage socket connections, authentication, and REST APIs for user and message.
- Integrated **MongoDB database** to persist user profiles, chat history, and room data with efficient querying.

Inscribe - Full-Stack Blog Application

(React, Node.js/Express, MongoDB, Deployment)

Jan 2025 – Feb 2025 | Personal Project

- Developed a **fully functional blogging platform** with interactive frontend and secure backend.
- Designed **user authentication system** (signup, login, JWT-based sessions) and role-based access for authors and readers.
- Built RESTful APIs in Node.js/Express to handle blog creation, editing, deletion, and comments.
- Integrated MongoDB database for storing user data, blog posts, likes, and comments.
- Deployed the application on a **cloud platform** on Vercel with CI/CD pipelines for smooth updates.

Financial News Sentiment Analysis

(NLP, MongoDB)

May 2024 – Jun 2024 | Remote

- Built an **end-to-end NLP pipeline** to analyze financial news sentiment and identify market trends.
- Scraped **hundreds of financial headlines** using BeautifulSoup and automated data collection workflows
- Preprocessed raw text with **spaCy toolkit** for tokenization, stop-word removal, lemmatization, ensuring cleaner input data.
- Trained a **BERT-based deep learning model** to classify news into positive, neutral, and negative sentiments.

ACHIEVEMENTS & CERTIFICATIONS

Certifications

- [Google Cloud Arcade Program](#) — Completed hands-on labs, covering Compute Engine, Cloud Storage, IAM, Cloud Functions, and networking.
- [Intel Unnati Training Program \(AI/ML\)](#) – built backend in flask
- [Smart India Hackathon 2024 Finalist](#) – Developed solutions for real-world problem statements.

Milestones

- Solved **400+ algorithmic problems**, strengthening Data Structure and Algorithm and real-world problem-solving abilities.
- Familiar with **design patterns** and scalable architecture practices.
- Passionate about building **production-grade systems**, learning new technologies.
