
Education

GLA University, Mathura
Bachelor of Technology in Computer Science
W.H. Smith Memorial School, Varanasi
Intermediate (Science Stream)
W.H. Smith Memorial School, Varanasi
High School

Aug 2022 - June 2026
CGPA: 8.02/10
May 2022
75.2%
May 2020
92.4%

Experience

Watermelon Software, Singapore (Remote)
Software Developer [Link](#)

Oct 2025 - Present

- Contributing to Watermelon's **Autonomous Functional Testing platform**, a no-code system designed to solve major enterprise testing challenges such as unclear requirements, regression testing, complex architectures, cross-browser testing, data management, and automated testing scalability.
- Built an **automated test-data generation system** that produces rich, requirement-aligned data without any manual intervention, improving testing speed, consistency, and coverage for enterprise clients.

Bodhitva.ai (Remote)
Data Science Intern [Link](#)

Feb 2025 - Present

- Designed **AI pipeline** to analyze resumes and match job descriptions using **NLP**
- Developed **automated system** generating MCQ, coding, and descriptive questions via **LLMs**
- Optimized **AI prompts** for role-specific assessments based on candidate skills
- Worked on **Agentic AI systems** for adaptive and autonomous workflows

GLA University, Mathura (Onsite)
AI Intern [Link](#)

June 2024 - June 2025

- Utilized **LLMs and ChatGPT API** for dynamic interview questions
- Integrated **Text-to-Speech** and **Whisper technologies** for interactive interviews
- Developed detailed post-interview reports with performance analysis
- Conducted **5,000+ AI-driven mock interviews**, impacting **2,000+ monthly users**

Meridian Solution, Delhi (Remote)
Data Science Intern

Feb 2025 - June 2025

- Built a RAG-powered chatbot** using embeddings stored in a vector database for enhanced accuracy and context-aware responses
- Developed a dashboard for chatbot management, real-time analytics, and API integration
- Optimized chatbot deployment with seamless integration, automated updates, and cost efficiency

Projects

Resume Parsing Website ([Live Link](#))

- Built an **AI-driven resume parsing system** with **94% accuracy**
- Designed **JD-aligned scoring algorithms**, improving JD alignment by **32%**
- Shortlisted top resumes with **AI-powered contextual matching**, improving recruitment by **40%**
- Developed personalized **AI insights** for grammar, keyword relevance, and project alignment

Skills

Programming:	Java, TypeScript, Python
AI/ML:	Natural Language Processing (NLP), Machine Learning, Deep Learning, RAG, LLMs, Prompt Engineering, Agentic AI
Library/Frameworks:	React.js, Node.js, Express.js
Databases:	MongoDB, ChromaDB
Professional:	Effective Communication, Teamwork, Time Management
Tools/Platforms:	Git, GitHub, ChatGPT API, Postman, Colab

Achievements

- Top 5 in **IIT Roorkee Hackathon (ProductathonAI 2025)**
 - Second Prize in **Startup-Expo at GLA University (Technavya'25)**
 - Solved **290+** problems on LeetCode
-

Activities

- Coordinated **Codecrunch 2024** by **IBM** at national level
